Editor:
European Certification Body GmbH
Lyoner Straße 18 • 60528 Frankfurt am Main • Deutschland

1 SCOPE

The lock guide is applicable for the following ECB•S certified products:

- Secure cabinets according to EN 14450
- Safes, ATM safes and Strongroom Doors according to EN 1143-1
- Deposit systems (deposit-safes and night safes) according to EN 1143-2

ECB•S certified secure storage units shall exclusively be equipped with high security locks according to EN 1300 which are listed both in the approved technical documentation (Annex to the certificate) and in the lock guide ECB•S R01. The mounting instruction of the listed locks have to be followed when used in a certified secure storage unit

In the lock guide, the following locks are classified:

- Mechanical key locks (KL)
- Mechanical code locks (CL)
- Electronical locks (EKL – Electronic token/key locks; ECL – Electronical code locks)

additional abbreviations:

- PS: Picking protection
- AS: Automatic scrambling
- IND: Indirect drive
- RS: Redundant system
- DS: Distributed system
- ¹⁾ mounting measurements are not shown according to the informative annex
 - D nach EN 1300:2023

Bolt design

- [Dead bolt, square bolt, straight bolt etc.
- ⊂ Flat bolt
- ∠ Swing bolt, roto bolt etc.

Please consider: The bolt dimensions are only generalized and categorized, e.g. “flat bolt” locks may differ in size and shape from each other. This lock guide does not express that all the listed locks are interchangeable.

Further features of ECB•S-certified locks can be found in the electronic product locator on our website www.ecb-s.com

The column „ECB•S certificate“ lists the current certificate number. In product specific lock lists the last letter may be replaced by an „x“ . For instance, „9696/HSL09-08B“ may be shown as „9696/HSL09-08x“ in products specific lock lists.

In addition to ECB-S-certified high-security locks, it is also permitted to install certified locks from other accredited certification bodies in ECB-S-certified secure storage units. These are, on the one hand, the "locks in black font" listed here, which also have a "certification label" from another accredited certification body, or the locks listed here in "grey font". When using the locks listed here from other accredited certification bodies, the secure storage unit manufacturer is obliged to obtain proof of fulfilment of the relevant class(es) in accordance with EN 1300 from the lock manufacturer and to keep it permanently available. Locks from other certification bodies must also be approved in the certificate of the secure storage unit (see annex to the ECB-S certificate).
